Grant Received

ECOSYSTEM ENHANCEMENT PROGRAM

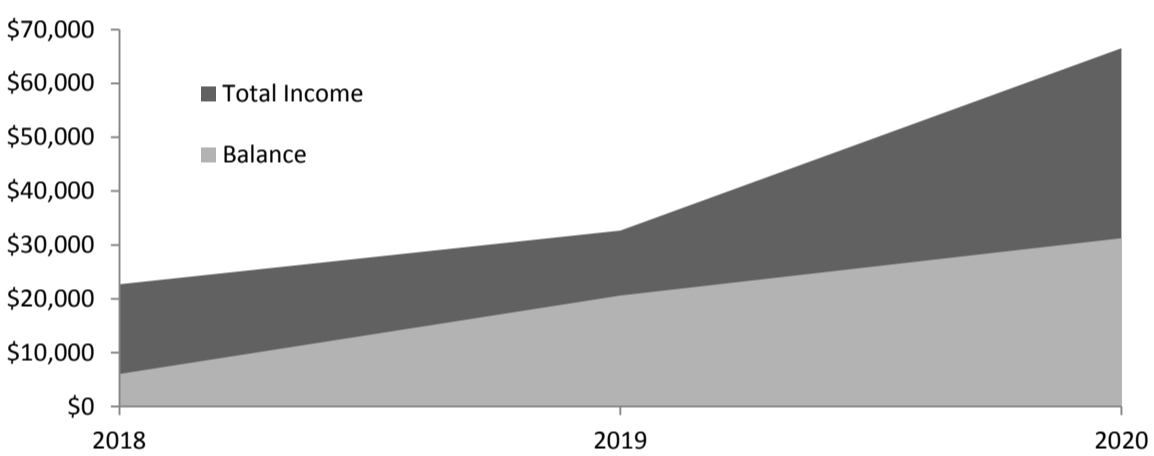

Columbia Basin trust

Grant Applied For

2BILLION TREES

Canada

Fiscal Management

At the end of 2020, we aligned fiscal year with calendar year, requiring a mini year-end.

Organizational Management

We've got big plans! On top of registering as a non-profit in Alberta to cover the entire Canadian range, we now have an Executive Director to build capacity and a Seed Orchard Coordinator to help establish this important resource of whitebark and limber pine seed. Follow us on our new social media accounts too.

Who is WPEFC (without you?)

We are an all-volunteer board, 2 part-time, contract staff, >50 volunteers, and a crew of fieldworkers devoted to the conservation and stewardship of whitebark & limber pine ecosystems through partnerships, science-based active management, restoration, research, and education.

Do you have expertise and want to help? WPEFC has upcoming [opportunities](#) in many capacities. You could help on committees, outreach, or get your boots on the ground. [Contact us!](#)
